Exploratory Testing: Test Charter

ATM Simulator System | Tester: Abd-Elrahman Bahaa

1. Charter Header

Charter ID	ATM-ET-001
Tester	Abd-Elrahman Bahaa
Date	20/10/2026
Time	8:30 PM - 9:00 PM
Duration	30 minutes
Application	ATM Simulator System (https://atmsimulatorsystem.vercel.app/)

2. Mission

Explore the ATM Simulator System's core features (login, balance inquiry, withdrawal, deposit, mini statement, PIN change, and language selection) to uncover functional defects, validation gaps, and unclear behaviors.

3. Scope

- **In Scope**
  - Login with valid, old, and invalid PINs, plus account lockout
  - Balance inquiry
  - Withdrawal: boundary amounts, full balance, zero balance
  - Deposit: invalid and valid amounts
  - Mini statement: transaction recording
  - PIN change: confirmation, input types, reuse of the old PIN
  - Language switching
  - Session behavior after page refresh
- **Out of Scope**
  - Load, stress, and performance testing of the website and server
  - Database testing (data storage, integrity, and direct queries)
  - Backend and API testing
  - Security and penetration testing (e.g., SQL injection, authentication bypass)
  - Infrastructure and hosting (deployment, server uptime, and availability)
  - Automated testing

4. Areas to Explore

- Login with valid, old, and invalid PINs, plus account lockout
- Balance inquiry
- Withdrawal: boundary amounts, full balance, zero balance
- Deposit: invalid and valid amounts
- Mini statement: transaction recording
- PIN change: confirmation, input types, reuse of the old PIN
- Language switching
- Session behavior after page refresh

5. Test Environment

- Device: Samsung Galaxy S23
- OS: Android 16

- Browser: Google Chrome

6. Test Data

- Account: 44441111
- PIN: 4444
- Starting balance: 90,000

7. Approach

Exploratory testing using boundary values, invalid inputs, and state-based checks (balance, PIN, lock status).
