[PIN Attempts] The remaining attempts message is not reset when switching accounts

Environment:

Windows - 11, Google Chrome – 155

Preconditions:

1. Two valid demo accounts exist.
2. Both accounts are active and not locked.
3. The user can access the ATM website.

Steps:

1. Log in using the first demo account.
2. Enter an incorrect PIN twice.
3. Check the remaining attempts message.
4. Click the "Eject" button and switch to the second demo account.
5. Open the PIN entry screen.

Expected results:

1. A message should show the remaining attempts after entering an incorrect PIN.
2. The message should disappear when switching to another account.

Actual results:

1. The remaining attempted message appears after entering an incorrect PIN.
2. The message remains visible after switching to another account, before entering any PIN.
