[Transaction Navigation] The system allows direct access to another transaction without pressing "Back" button

Environment:

Windows - 11, Google Chrome – 155

Preconditions:

1. A valid demo account exists.
2. The account is active and not locked.
3. Log in using a valid demo account.

Steps:

1. Select any transaction from the main ATM screen.
2. Click another transaction button without pressing the "Back" button.

Expected results:

1. The user must press the "Back" button to return to the main ATM screen before opening another transaction.
2. Other transaction buttons should not be clickable on the current transaction screen.

Actual results:

1. The system allows the user to open another transaction directly from any transaction screen without pressing the "Back" button.
2. Other transaction buttons remain clickable on the current transaction screen.
