[Mini Statement] Transaction timestamp changes after changing the time zone

Test object: Mini Statement / Transaction Timestamp

Environment: Chrome and Android 11

Preconditions:

1. User is logged in.
2. The application allows the time zone to be changed.
3. Mini Statement is available.

Steps:

1. Change the application's time zone.
2. Perform a transaction.
3. Open Mini Statement.
4. Check the displayed transaction timestamp.

Expected Result:

1. Transaction timestamps should follow the application's defined time-zone behavior.

Actual Result:

1. The transaction time displayed in Mini Statement changes after the time zone is changed.
