Time	Action	Result
0:29	Refreshed the page with the locked account	**Account remained locked (Q-01)**
0:30	Refreshed the page after changing a valid account's balance	**Balance refreshed (Q-02)**

3. Bugs Found

BUG-01: Mixed languages after switching language to Hindi

- Severity: Low
- Steps:
    1. Scroll down to the language buttons.
    2. Choose the button for Hindi language.

BUG-02: System accepts changing PIN with letters

- Severity: High
- Steps:
    1. Log in.
    2. Go to Change PIN.
    3. Enter a PIN made of letters.
    4. Confirm it.

BUG-03: Login attempts counter does not match the actual lockout limit

- Severity: Medium
- Steps:
    1. Open the login screen.
    2. Enter a wrong PIN.
    3. Note the remaining-attempts message (2 remaining attempts).
    4. Keep entering wrong PINs until the account is locked.

4. Questions

- **Q-01:** After the account was locked, it stayed locked after a page refresh. Is the lock stored server-side (expected), and how is a locked account unlocked?
- **Q-02:** After changing a valid account's balance and refreshing the page, the balance was refreshed. Is the refresh behavior intended?

5. Coverage Summary

- **Covered:** Login, balance inquiry, withdrawal, deposit, mini statement, PIN change, language change, lockout, refresh behavior.
- **Not covered:** Other browsers/devices, desktop view, session timeout.
